
(a) fields $c + \alpha(u - c) + \gamma(a - c)$
region as written
safe anchor a
improved region
safe field c
unsafe request u
α: weight on $u - c$
γ: weight on $a - c$
$P(A)$ of the outputs
1: unsafe request u
$P(A) = 0.256$
2: enforced, as written
$P(A) = 0.141$
3: enforced, improved
$P(A) = 0.028$
4: safe field c
$P(A) = 0.007$
5: halfway between c and a
$P(A) = 0.002$
6: safe anchor a
$P(A) = 0.000$
